Wholesale Only

This list is for the trade only. We do no retail business.

For Bush, Climbing and Tree Roses please refer to
List No. 6101 for 1961-62

INDEX

	Page
Important Information.....	Inside Front Cover and 1
Conifers	2
Broad Leaved Evergreens.....	9
Flowering Fruit Trees.....	23, 26
Deciduous Trees	27
Lilacs	34
Oriental Magnolias	38
Flowering Quinces	39
Deciduous Shrubs	43
Climbers	46
Wisterias	47, 48

Prices. All prices and other quotations not accepted to date are hereby cancelled.

For less than five of a kind and size of these items, please add 10%.

Because of rapidly changing conditions we reserve the right to revise prices in this list if necessary.

All prices are for goods at our nursery unless otherwise stated.

Terms. 2% for cash, 10 days from date of delivery, except on packing, prepaid freight, etc., which are net. 30 days net to buyers of known and established credit, otherwise cash with order, or 25 per cent with order and balance C.O.D.

Pro-Rate. All orders are booked subject to crop yield and pro-rate, in the event a smaller crop is harvested than was anticipated.

Grading and Packing. Plants wider than tall are graded by width. Packing at cost, as usual. Plants will be packed to secure the lowest possible classification consistent with the nature of the goods shipped.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight, express or truck line. A moderate charge will be made for delivery by our trucks to areas over 50 miles distant from nursery.

Warranty. Seller gives no warranty, express or implied, as to the variety or productivity of any nursery stock he sells. Liability in all instances is limited to the purchase price. No liability is assumed by the seller for delay or failure to deliver caused by wars, strikes, fires, floods, droughts, embargoes or any other contingencies beyond seller's control. If the purchaser does not accept the goods on these terms they are to be returned.

Complaints. Must be made in writing within 10 days after buyer receives the goods.

New Items

In addition to our regular lines we are continually developing or introducing additional *novelties and specialties*. For the past 25 years we have doubtless imported the greatest assortment of new and rare woody plants brought into this country during that period, and at the same time have carried on a program of breeding various woody ornamentals, including Lilacs, Flowering Quinces, Flowering Fruit Trees, etc.

In order to call your attention to some of these items that are now available we have "boxed in" many plants of special interest.

ABBREVIATIONS

Letters A, B, C, D, E, etc., after variety names indicate sizes available.

BOTANICAL REFERENCES

Wherever appropriate, HORTUS SECOND (Bailey) has been used as the reference in establishing botanical nomenclature.

HARDINESS RATINGS

As this list goes all over the U. S. A. and also abroad, we believe it a good idea to indicate hardiness. This has been done by giving after the name of each item a number in () indicating the zone in which it is considered hardy. Please understand that ratings show our honest opinion, but we disclaim all responsibility for their correctness. Please refer to map in center of book, used by courtesy of U. S. Department of Agriculture.

PINTO TAG

We take pride in being a "Pinto Tag" nursery, enabling us to ship into nearly all California Counties with no point of destination inspection required.

LOCATION

Office and Sales Yard located on the Old Oakland Road at Coyote Creek Bridge, about one-fourth mile north of San Jose City Limits. Other growing grounds are within a mile or two of the office. Visiting nurserymen are welcome at all times.

IMPORTANT NOTICE FOR EASTERN NURSERYMEN

Out here everything east of the Rockies is "Eastern."

During January and February we ship several heated refrigerator cars or trucks to eastern points. Where size of order justifies, we can nearly always arrange for carload service to destination or some nearby point for pickup or reshipment. The total transportation charges for each car or truck will be prorated among all customers who have goods in it.

Conifers

Unless otherwise stated, all plants in this section will be balled at prices quoted, except those in containers.

HOW TO USE THIS MAP

From it determine what zone you are in. Every item carrying your zone number or a smaller number should be hardy with you. If you want to gamble on those rated one zone greater, there is at least a chance for success but two zones greater will probably be hopeless.

For full explanation of the entire system see Page 2.

Lilacs

SYRINGA vulgaris (3)

For more than twenty-five years we have been engaged in a program of Lilac breeding and selection with two main objectives; first to broaden the color range of Lilacs and second, to improve the form and size of the individual florets and of the flower clusters.

NOTE: Lilacs require time to become fully established and cannot be expected to produce flowers of normal size and color for two or three years after transplanting. It is recommended that unopened flower buds be removed the first year after planting, and that faded flower clusters be removed in following years. It is also suggested that lilacs be planted with the bud union three or four inches below the surface of the ground.

All lilacs from 1½ ft. up have been pinched and are well-developed, branched plants.

(Please order bare-root lilacs in multiples of five of each size and variety as they are bundled that way when dug.)

NOVELTIES and NEW INTRODUCTIONS

3	to 4	ft. branched.....	1.75
2	to 3	ft. branched.....	1.50
1½	to 2	ft. branched.....	1.25
1	to 1½	ft.....	1.00

Fantasy (New)

A W. B. Clarke & Co. introduction having a unique combination of colors! The large **double** flowers borne on upright compound clusters are a pleasing mauve-pink in the bud and on the outside of the petals. As the flowers open they are a much lighter shade of mauve to lavender on the inside, finally showing almost white in the fully matured flowers. The substance of the flowers is unusually heavy and waxlike and as a result they will keep well when cut.

Purple Gem (New)

A W. B. Clarke & Co. introduction of outstanding quality, having medium large **single** flowers, borne on long heavy clusters, well above the foliage. Buds and open flowers are a rich ruddy purple of a gem-like brilliancy, with some violet showing in the fully open clusters. This mid-season lilac seems to be an excellent keeper as a cut flower and should be a welcome addition to the list of dark flowered varieties.

NOVELTIES (continued)

Souvenir de Georges Truffaut (Lemoine)

A magnificent variety with very long and broad thyrses, enormous flowers, pale lilac flushed mauve, clearer eye. Flowers often **semi-double**.

Souvenir de Luis Chasset (New) (Lemoine)

Enormous **single** flowers in large, broad compound clusters of a deep ruby red! This is an outstanding variety blooming about mid-season and is probably the best so-called "red" lilac developed to date.

Spring Dawn (New)

Grown specifically for its pleasing and unusual color and for its freedom of bloom in large compound spikes. Flowers are **single**; buds pink to rose, opening to a soft blue.

SELECTED LIST

B 3	to 4	ft. branched.....	1.30
C 2	to 3	ft. branched.....	1.10
D 1½	to 2	ft. branched.....	.90

Letters after varieties indicate sizes available.

Double Flowering Group

Alice Eastwood, CD, dark purple buds, opening mauve pink with long, slim, elegant clusters, four sided, and frequently paired; medium late, on vigorous erect plants.

Ami Schott, BCD, very fine deep blue, midseason bloom, on sturdy, well developed plants.

Capt. Perrault, BCD, probably the best of the double pinks, early blooming and compact habit.

Ellen Willmott, CD, white, with well-formed clusters, midseason bloom, on compact growing plants.

Gismonda, CD, reddish purple, much darker in bud, with large individual "florets." Midseason to late bloom, on medium growing plants.

Katherine Havemeyer, BCD, purplish mauve, rather large "solid" clusters, with midseason blooms, on medium fast growing plants.

Maximowicz (Maxie), BCD, violet heliotrope, well formed clusters, fairly early blooms on medium growing plants.

SELECTED LIST (continued)

Double Flowering Group (continued)

Mrs. Edward Harding, BCD, called "red" by its originator, it is more nearly a reddish purple, but a very fine unusual color in lilacs. Rapidly makes a large bush.

Paul Thirion, BCD, claret rose, with individual "florets" like large double violets; a late flowering variety, on a compact, rather slow growing bush.

Splendor, BCD. Plant Pat. No. 837. The dark ruddy purple buds open to purplish blue, moderately large **double** flowers in clusters of good size. Mid-season to late. The blooms are not crowded in the clusters which spoils so many otherwise good doubles.

Sunset, BCD. Plant Pat. No. 937. Buds are deep mauve carmine; the fully **double** flowers with numerous long "petals" are over an inch wide and ruddy purple.

Sweetheart, CD. Plant Pat. No. 1128. Buds Fuchsia purple opening to pale lavender.

Violetta, BCD, dark violet, very double flowers in medium clusters, about the latest to bloom; of medium growth habit.

Single Flowering Group

Blue Hyacinth, BCD, dark blue hyacinth shaped flowers in large clusters, early blooming on erect growing plants. This is a fine, unique variety, and highly recommended.

Clarke's Giant, BCD. Plant Pat. No. 754. Enormous **single** flowers of soft gentian blue. Huge clusters of unusual pyramidal form up to 12 in. long and 7 to 8 in. wide at base. Plant is tall and vigorous growing.

Esther Staley, BCD. Plant Pat. No. 768. Opening buds are red; flowers large, **single** and pure pink without the usual lavender tinge. Clusters of good size and produced freely in mid-season.

Firmament, BCD, sky blue with large well-placed clusters. Blooms in midseason on medium sized plants.

SELECTED LIST (continued)

Single Flowering Group (continued)

Jan Van Tol, BC, purest white, large flowers in huge clusters, blooming in midseason. Clusters are well placed on medium fast growing bushes.

Kate Sessions, BCD, mauve purple to blue, in large well placed compound clusters. This is the *earliest* of all our lilacs, and deserves to be in every collection! Medium growing, bushy plants.

Marceau, BCD, deep violet purple, large individual flowers in heavy clusters, midseason to late blooming, and of medium growth habit.

Marechal Foch, BCD, carmine rose, in enormous trusses, early midseason blooms, on long straight stems from vigorous growing bushes.

Monument, BCD, a showy white in very compounded rounded clusters, blooming well above the foliage. Has an enormous crop of flowers in early midseason on fast-growing plants.

Mrs. W. E. Marshall, BCD, dark purple, in large clusters borne well above the foliage. Late blooming, on good medium growing plants.

Prodige, BCD, deep purple, large individual flowers in short, heavy clusters borne in midseason on medium growing bushes.

Purple Heart, BCD. Plant Pat. No. 832. This very early variety has purplish black buds, opening to deep purple, **single**, very large flowers attaining between 1¼ to 1½ inches in width, borne in large clusters.

Volcan, BCD, dark ruby purple, medium flowers in medium sized clusters; rather late blooming on slow-growing plants. After over 60 years, this is still one of the better dark-flowered single varieties.

Syringa oblata 'Dilatata,' BCD. Light mauve pink blooming several weeks earlier than the *S. vulgaris* varieties.

Assorted, grafted from choice named varieties.

5 gal.	2.50

ROSES

BUSH, CLIMBING AND TREE FORM

See our list No. 6101 for complete descriptive catalog of the finest *Northern California grown Roses*—both patented and non-patented varieties.

Oriental Magnolias

We grow what is probably the most complete collection of deciduous Magnolias in this country and take great pleasure in offering this fine list.

SPECIAL VARIETIES

2 gal. grafted.....2.25

MAGNOLIA campbelli (7)

Flowers are rosy pink and range anywhere from 8 to 14 inches wide. Prefers cool, moist conditions. Commences blooming on older plants.

liliflora 'Gracilis' (5)

This is a very rare and striking variety. Buds are pansy black. Open flowers are almost that dark outside and dark velvety purple inside. Flowers are large and produced freely even on young plants. Do not confuse this with *M. liliflora*, the common purple Magnolia.

sargentiana 'Robusta' (7)

A very beautiful variety related to *M. campbelli* with immense rosy-pink flowers freely borne on older trees.

sinensis (7)

CHINESE MAGNOLIA

A lovely variety bearing pendulous saucer shaped pure white flowers with showy crimson stamens.

sprengeri 'Diva' (7)

A Magnolia species of unique charm. Flowers are an attractive shade of carmine pink. Very showy and free blooming on older plants.

thompsoniana (6)

Flowers creamy-white, richly fragrant, and borne freely over a long period commencing in May. The large leaves assume a fine bronzy yellow autumnal tint.

veitchi (7)

A magnificent hybrid of *M. denudata* x *campbelli*. A very vigorous large tree bearing a profusion of rosy pink flowers of great size.

veitchi rubra (7)

Has all the characteristics of *M. veitchi* but the flowers are purple.

wilsoni (5-6)

A delightful shrub or small tree with drooping saucer-shape pure white flowers and deep crimson anthers. Intensely fragrant.

Flowering Quinces

Chaenomeles (Cydonia) (4-5)

We have carefully revised our list as new introductions have proven themselves so that today we can offer the finest, most complete list of Flowering Quinces available anywhere.

Because of the extremely long blooming season and the short dormant period of Flowering Quinces here on the West Coast, it is recommended that when received, the plants be canned immediately so that later crops of flowers will develop for display; although the best flowers will not be produced until the plants have been established for at least a year.

(Quinces must be ordered in multiples of 5 of a size and variety as they are bundled that way when dug.)

NOVELTIES

CAMEO

The finest **double** flowering Quince we have found, having 20 or more petals and a pleasing, soft apricot-pink coloring. Flowers are large and borne in great profusion on the compact, bushy plants. This variety is outstanding in every way including color, doubleness and freedom of bloom. Habit of growth low and spreading, and thornless.

3	to 4	ft.	1.50
2	to 3	ft.	1.25
1½	to 2	ft.	1.00
1	to 1½	ft.	.80

CLARKE'S GIANT RED

The more than 20 years of Quince breeding by the late W. B. Clarke has resulted in producing what we believe to be the largest and finest red flowering Quince to date. **Clarke's Giant Red** is a deep, bright red of great brilliancy, 2½ inches or more in diameter. The enormous overlapping petals and prominent golden stamens make a showy contrast. It is an orderly shaped shrub with dark green serrated foliage. Extremely free blooming, having several crops of blossoms, resulting in a long flowering season.

3	to 4	ft.	1.50
2	to 3	ft.	1.25
1½	to 2	ft.	1.00
1	to 1½	ft.	.80

FLOWERING QUINCES (continued)

SELECTED LIST

2	to 3	ft.	1.25
1½	to 2	ft.	1.00
1	to 1½	ft.	.75

Available in all sizes except where otherwise shown.

AFTERGLOW, Plant Pat. No. 847. Large *double* flowers, opening pure white, later becoming pink, and finally rose. First crop opens medium late, with later crops after foliage starts. Plants are bushy and erect.

APPLEBLOSSOM, a unique blending of rose, pink and white flowers open almost white and quickly deepen to the "appleblossom" coloring. Early to midseason, with long blooming period. Erect growing shrubs.

CANDIDA, large pure white, blooming in early mid-season, with one or more later crops of flowers. Of tall and fairly rapid growth habit.

CARDINAL, very large brilliant deep red flowers borne profusely all over the plant. Early blooming, and bearing flowers continuously for a long period of time on the tall, bushy plants.

CHARMING, soft shell pink, deepening toward the edge of the petals. Flowers borne on long thornless shoots in a succession of crops. An orderly shrub to about 6 feet.

CORAL BEAUTY, very fine rosy coral, with a softer coloring at center of flower. Blooms early to late with several crops of flowers. Shrub is bushy and wider than high, practically thornless.

CRIMSON & GOLD, large flowers a magnificent deep crimson, with large showy golden anthers. One of the earliest to bloom, but lasting well toward the end of the season with a succession of blooms. A neat, well branched shrub of moderate height.

ENCHANTRESS, very large flowers, a true shell pink deepening somewhat with age. Early midseason to late blooming on an upright growing plant.

FLAMINGO, a soft coral pink, large flowers, having a long blooming season. An upright growing, many-branched plant.

FLOWERING QUINCES (continued)

SELECTED LIST (continued)

PINK BEAUTY, flowers opening pink, deepening to rose pink as they mature. Very early and heavy bloom, followed by a succession of several later heavy crops of flowers. Growth is vigorous and upright.

PINK LADY, large clear pink flowers, first crop early, followed by several more crops. Growth is low and spreading and plants are practically thornless.

RED CHIEF, deep red *double* flowers, opening in mid-season and continuing with a succession of flower crops to late in the season. Of medium size and upright growth habit.

RED RUFFLES, Plant Pat. No. 941.

Large brilliant red ruffled flowers of exceptional quality. Blooms heavily from midseason to late. An upright, slender and vigorous grower.

ROXANA FOSTER, flowers large and profuse, a deep shell pink, shading to carmine at the tips. Blooms almost continuously from midseason to late. Habit is compact and slow growing.

SNOW, enormous snow white flowers without any other color, blooming from midseason to late, on strong well developed plants. This is the best white flowering Quince we have seen.

STANFORD RED, the large flowers open tomato red, deepening to a rich red. Blooms from early mid-season to very late, and cut flower branches last exceptionally well indoors. A rapid growing, spreading plant, of pleasing habit, and highly recommended.

TEXAS SCARLET, very large watermelon red or scarlet flowers, profuse blooming from early midseason to late. Plant is of moderate, compact growth, and thornless.

QUINCES, by color only.

Red, Orange, Pink, White and Bicolor.

TREE PEONY

Our stock of blooming size field grown (balled) Tree Peonies is unusually fine this year. Careful seed selection in past years has resulted in this year's crop being the best yet. Color range is magnificent with several new shades available. Size and quality of flowers is exceptional and grading is liberal. You will not be disappointed with this stock.

Wisterias

For many years we have grown what we believe to be the best available collection of Wisterias in this country, both vines and tree form.

They range in color through dark purple, lavender, blue, pink, and white, and in form, from the long-clustered floribunda (Japanese) types to the short-clustered sinensis (Chinese) and venusta (Silky) types.

We call your attention to the list and descriptions below, and invite you to try out these spectacular climbers and trees, as they are hardy throughout the United States, except for the coldest areas of Zones 3 and 4.

Climbing form, grafted (4-5)

3 year	1.75
2 year	1.50
5 gal.	2.25

floribunda 'Geisha' (4), blue.

floribunda 'Issai,' blue purple.

floribunda 'Longissima,' extra long light purple.

floribunda 'Longissima Alba,' white.

floribunda 'Rosea,' pink.

floribunda 'Royal Purple,' violet purple.

floribunda 'Violacea Plena,' double violet.

sinensis (5), Chinese Wisteria, blue.

sinensis 'Alba,' White Chinese Wisteria.

venusta 'Alba' (5), White Silky Wisteria.

venusta 'Violacea,' Silky Wisteria, lavender purple.

Tree Wisterias

When they are mature they have heads to 6 or 8 feet in diameter, and carry hundreds of flower racemes hanging gracefully all over the tree.

Because it is necessary to prune or "pinch" the long runners formed each Spring, these trees produce a maximum of short flowering spurs, so that the mass effect of such trees in full bloom is almost unbelievable.

Plants listed below are already headed, and need merely to be planted, staked and pruned occasionally during the growing season to give the most beautiful display each Spring.

grafted

Heavy grade (about $\frac{5}{8}$ in. caliper).....	5.50
Regular grade (about $\frac{1}{2}$ in. caliper).....	4.50
